

Sodanet's Dataverse Development

Dr. Apostolos Linardis

Research Director

National Centre for Social Research

Scientific Responsible of EKKE's Data Repository

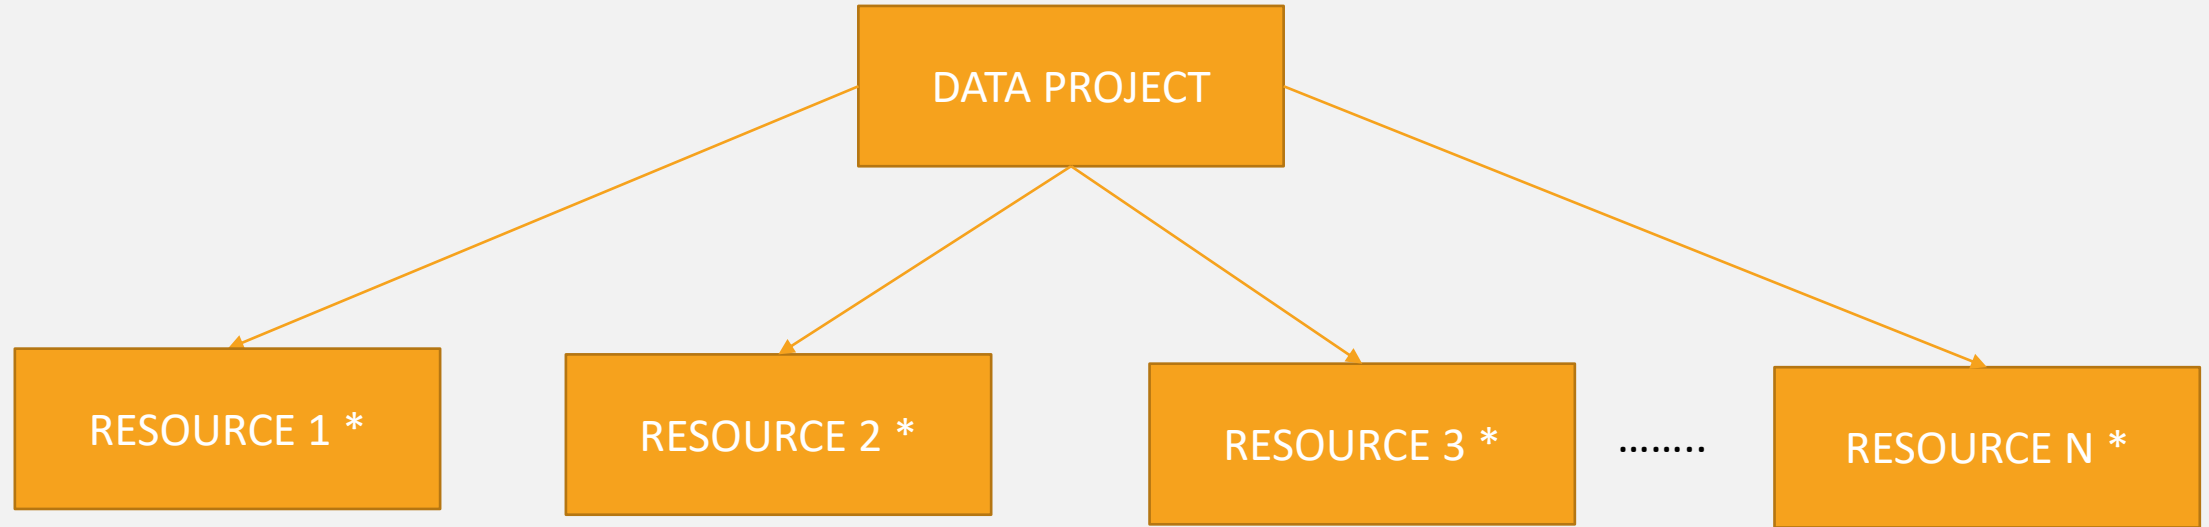

Important Dataverse Implementations

1. Extended documentation and management on Data Project Level (DPL) (Dataverse Entity: Datasets)
 - Indices and Classifications.
 - Statistical Data (SIMS).
2. Extended documentation and management on Resource Level (RL) (Dataverse Entity: Files)
 - Access levels.
 - Variable and Question Management.
 - Cube management & Pivoting.
 - Reusability of existing internal resources in Data Projects.
 - Use of external resources in Data Projects.
3. Stats and Maps Application: online analysis (R-Server / R-Shiny) and online maps creation (Geoserver).
4. Graphical redesign and upgrade of frontend and backend environments (Bootstrap & JQuery implementations).
5. OAI Integration with CDC (Compliant with DDI 2.5 Profile - Basic Validation Gate / 22-11-2021).

Other Dataverse Implementations

- Support of Cessda CVs.
- Support of Multilinguality (two languages: Greek & English).
- Performance issues solved (cases with many variables, questions or resources).
- Search issues: Solr 7.3 upgraded to 8.9, Stemming and Lemmatizer enabled for the Greek language / Search by variable.
- Customization of DOI generation mechanism.
- Export to DDI 2.5.
- SSO with other Sodanet Implementations.

2.EXTENDED DOCUMENTATION & MANAGEMENT ON RL: ACCESS LEVELS

***ACCESS**

- Unrestricted + (Embargo period)
- Access upon login + (Embargo period)
- Restricted – Available upon Request +(Embargo period)
- Restricted

new access implementations are highlighted with red color

1.EXTENDED DOCUMENTATION & MANAGEMENT ON DPL: DATA PROJECT CATEGORIES

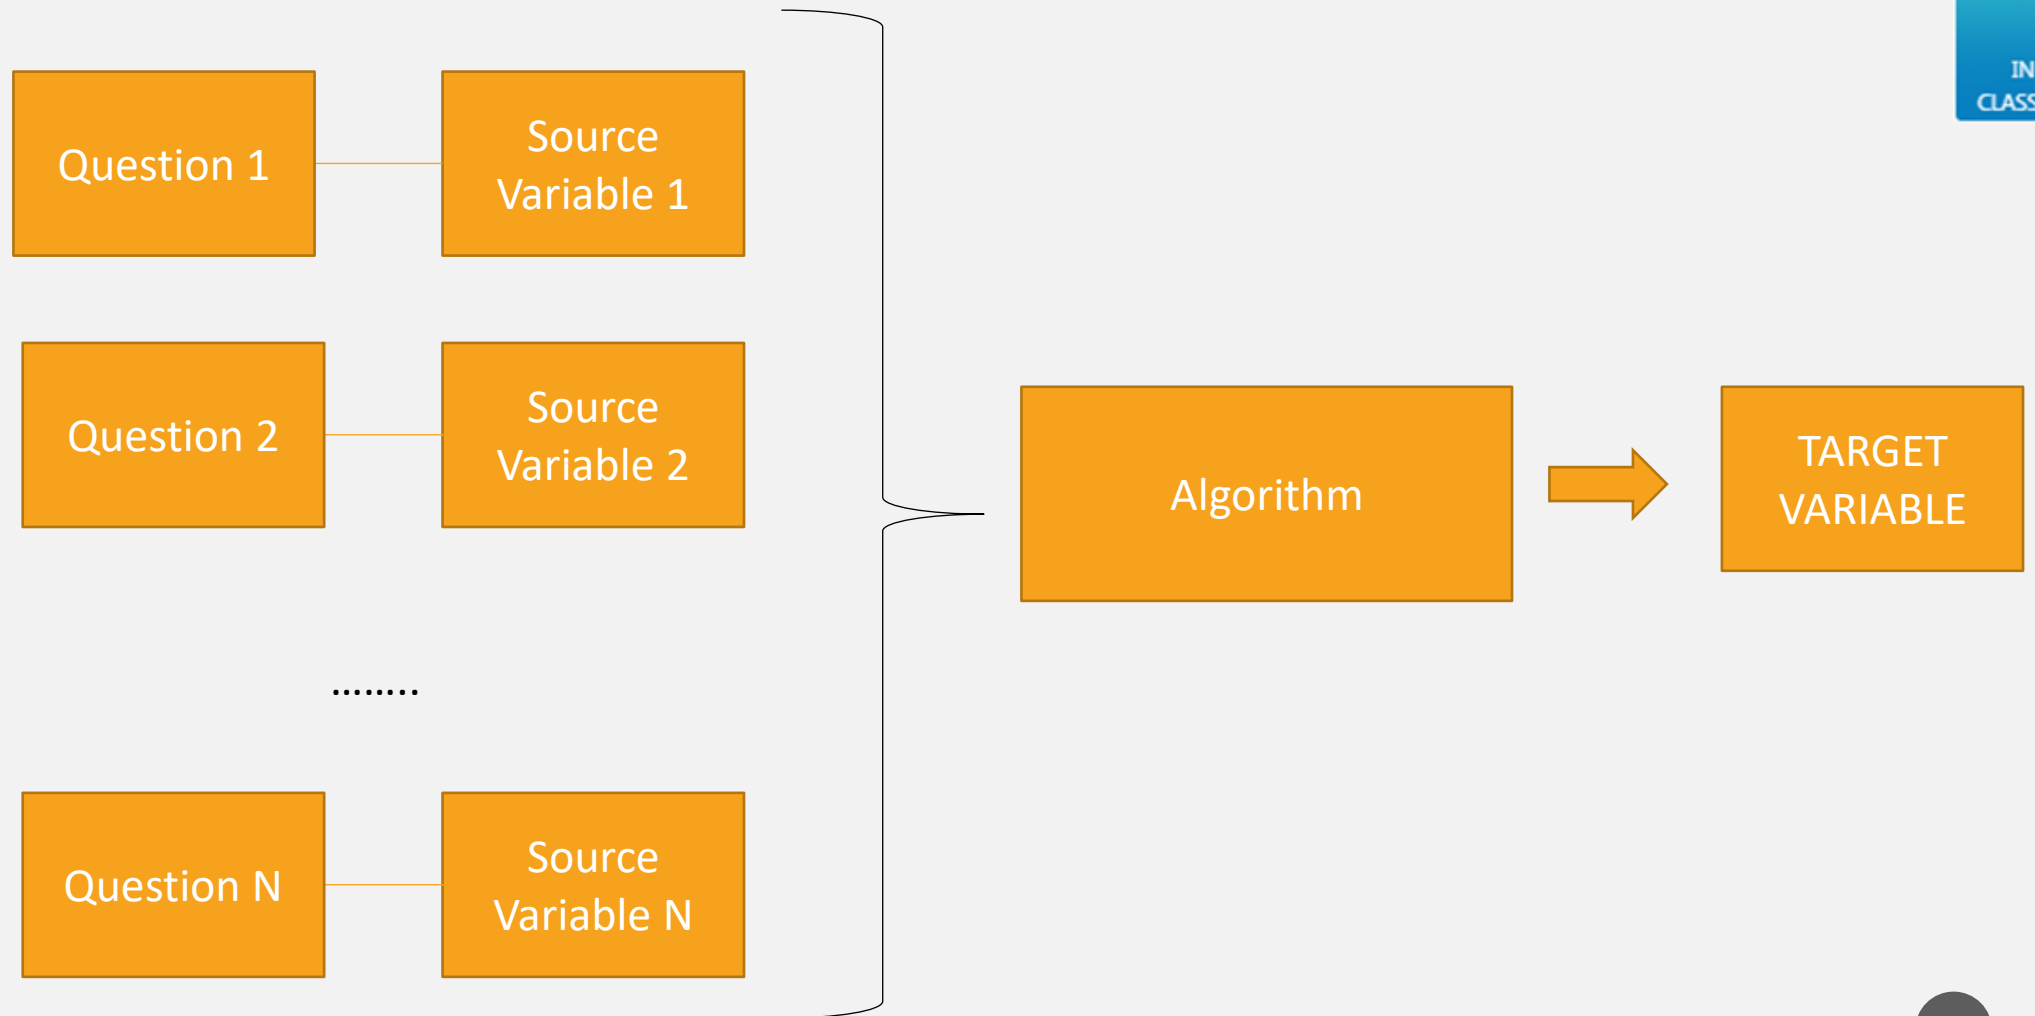

New developments mainly concern :

DPL → Data Project Level

RL → Resource Level

Summary information

Study title

The Internet in Cyprus 2014 (Greek-Cypriot and Turkish-Cypriot Community)

Creator

Demertzis, Nicolas (National Centre for Social Research, National and Kapodistrian University of Athens)

Study number / PID

doi:10.17903/FK2/L4WTVC (DOI)

Abstract

This is the fourth "Cyprus World Internet Project" survey. It was conducted in October-December 2014. The sample size of the Cypriot data is 2039 (1000 from the Greek-Cypriot community and 1039 from the Turkish-Cypriot community). Information was gathered via personal interview with a sample of 1000 Greek-Cypriots and 600 Turkish-Cypriots. The data collected is therefore more significantly representative of the Cypriot population than the first survey conducted in 2008 which considered only the views of the Greek-Cypriot community. Main topics: ICT Usage, Internet access hours, Digital divide, Internet impressions, Media use, Online transactions, Social networking, Identity and social relations, Overall evaluation of the internet, Multitasking and Communication, Entertainment, Everyday transactions, Learning, Political self-placement and political efficacy, Freedom of speech and surveillance, Information and discussion about the Cyprus Problem.

The map displays the Balkan Peninsula and surrounding regions, including Italy, Albania, North Macedonia, Greece, Bulgaria, and Turkey. Major cities like Rome, Athens, Istanbul, and Ankara are labeled. The map also shows the Black Sea, Mediterranean Sea, and the Aegean Sea. The map is interactive, with a sidebar on the left for map creation and a top navigation bar with various links.
